

Epilog

(Chinatown- Chinese American Achievements, 40's, 50's, & 60's Exceptional Generation)

A short list of friends and acquaintances from that era are presented for historic notation and to serve as role models for succeeding generations to follow and appreciate the hard work of earlier generations in breaking down the educational, discriminatory, and competitive challenges to achieve their successes in various professions and businesses. These children of Southern Chinese immigrants were blessed with a solid foundation of church teachings and guidance, good school teachers, and a rich Chinese competitive heritage and family values to make a positive contribution to America. Our *exceptional Chinese American 40's-60's generation(s)* is a testament to the fact that the USA is truly the land of opportunity, in spite of its many prejudices and "barriers to entry" practiced by many professions and businesses at the time.

The list can go on and on...especially, the large number of Chinatown boys & girls that went onto engineering, science, mathematics, and education where we would fill up several more pages.

If we were to assemble a **"focus group"** to help recall names from the past, there is little doubt that this list will expand with additional names to our **"Children of Southern Chinese Immigrants' Professional Family Tree"**. When you consider our children, who went on to their own respective professional careers, the professional family tree will be even larger to serve as a clear illustration of the accomplishments and successes that the generations of Chinese Americans have been blessed with here in America.
